The galaxy's majestic and mystifying beauty is one of the most iconic recurring themes in art, literature and science. A'Star Jewellery has based its new collection "Nova" on one such magnificent phenomenon of the universe.

The modest brilliance of a single diamond is amplified by placing a number of diamonds together in a seamless cluster formation, so as to replicate the dramatic burst of light of the Nova star. The diamond cluster or Nova is the brightest object in the design, giving it a distinctive and vibrant look.

Crafted in 18 kt yellow and pink gold, these galactic rings and earrings signify optimism and progress, and are designed for the woman who wishes to be the brightest star in the sky.
