

As a part of its social project, Asian Star contributed funds towards the extended construction of Shrimad Rajchandra Hospital situated in the heart of Dharampur town, Valsad district in Gujarat. It is a multi-specialty charitable hospital fully equipped with state-of-art diagnostic and therapeutic departments to facilitate treatment of various medical and surgical diseases.

We aim to make healthcare facility accessible and affordable to disadvantaged tribal people residing in remote areas of Gujarat who desperately need basic as well as advanced medical aid. The funds will be channelised towards building better infrastructure by expanding the capacity of the hospital from 70 beds to 200 beds, thereby accommodating increased intake of patients.
